

Craven Street Improvement Project: Low Impact Parking Lot

Posted 12/10/2014
Last Revised 05/06/2015

Timeline

2015 SPRING

Estimated project completion

2015 MAY

The general parking area is 90% complete.

The trail head parking lot is on hold until updated plans are created.

2014 NOVEMBER/DECEMBER

Low Impact Parking Lot project begins.

What's happening now?

Fill material is being transported to the site in order to elevate the surface level in line with the project design. Two parking lots will be constructed. One is a landscaped gravel lot for general parking with an entrance off Emma Road. The other is a parking lot at the greenway trail head which will also be a low impact lot with porous pavers. Work on this project will continue throughout the winter and be completed by early spring 2015.

Background

This project includes the construction of a Low Impact Development (LID) parking lot at the north side of New Belgium's site to accommodate necessary public parking and visitor and resident wayfinding. Stormwater best management practices are a significant feature of the site's design.
